Hazardous Weather

Severe Thunderstorm Potential - 4 pm to 7 pm

Storm Motion East at 25-30 mph

Weather Forecast Office

Amarillo, TX

Issued Jun 26, 2020 4:29 AM CDT

Severe storms are possible this afternoon and early evening from 4 pm to 7 pm in the far northwest Panhandles. Main threats are wind and hail with a very low potential of tornadoes. Storms will be moving east at around 25 to 30 mph with little potential of flash flooding, but heavy rainfall could lead to some localized flooding. Stay weather aware!

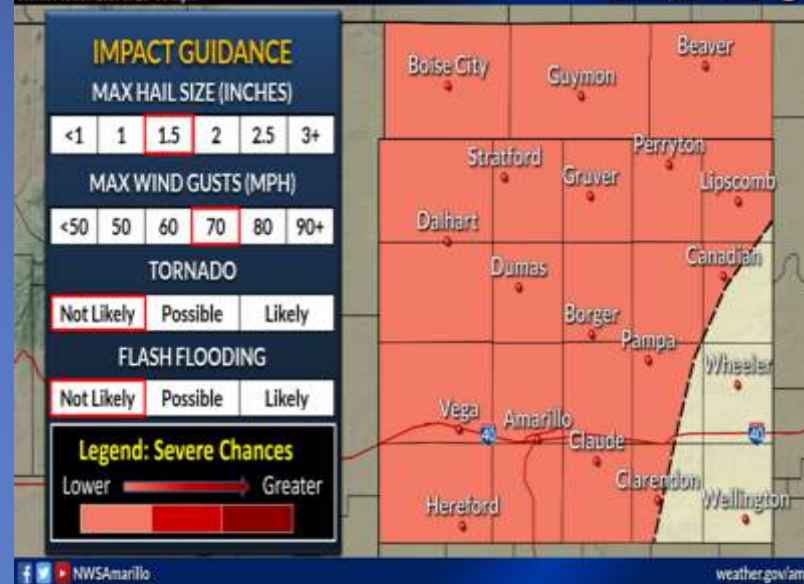

Severe Thunderstorm Potential - 7 pm to 10 pm

Storm Motion East at 25-30 mph

Weather Forecast Office

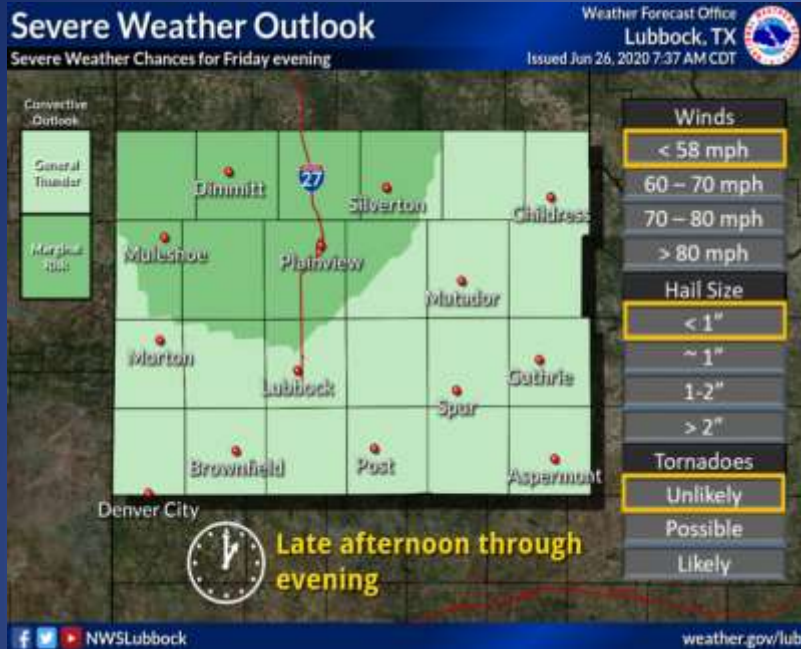

Amarillo, TX

Issued Jun 26, 2020 4:27 AM CDT

Severe storms are possible this evening from 7 pm to 10 pm across a majority of the Panhandles. Main threats are wind and hail with a very low potential of tornadoes. Storms will be moving east at around 25 to 30 mph with little to no potential of flash flooding, but heavy rainfall could lead to some localized flooding. Stay weather aware!

Hazardous Weather

Isolated thunderstorms will be possible today across West Texas, mainly in the late afternoon and evening hours. The best chance for a localized damaging wind event will be in the northern South Plains and the central and western areas of the extreme southern Texas Panhandle. The main hazard will be strong gusts of 50-60 mph.

Scattered showers and storms possible southeast of a line from San Saba to Mason to Junction. Otherwise, dry with highs in the 90s.

Hazardous Weather

Scattered to numerous showers and thunderstorms are forecast to affect the eastern two-thirds of South Central Texas today, especially areas along and east of Interstate 35. Flash flooding is possible. Highs will be in the upper 80s most areas to mid 90s along the Rio Grande.

Scattered to numerous showers and thunderstorms along and east of I-35 today are expected to produce flash flooding. Rainfall amounts are expected to range from .5 to 1.5 inches with spots getting up to 4 inches of rain through Saturday morning. When Flooded, Turn Around Don't Drown.

Hazardous Weather

Expected Rainfall Through Tonight

Heavy Rainfall | Localized Flooding Possible

Weather Forecast Office
Corpus Christi, TX
Issued Jun 26, 2020 3:41 AM CDT

Heavy rainfall is possible once again today. Localized flooding is possible with 1-3" of rain expected. Isolated higher amounts are possible. Remember: Turn Around, Don't Drown.

Scattered to Numerous Showers/Storms

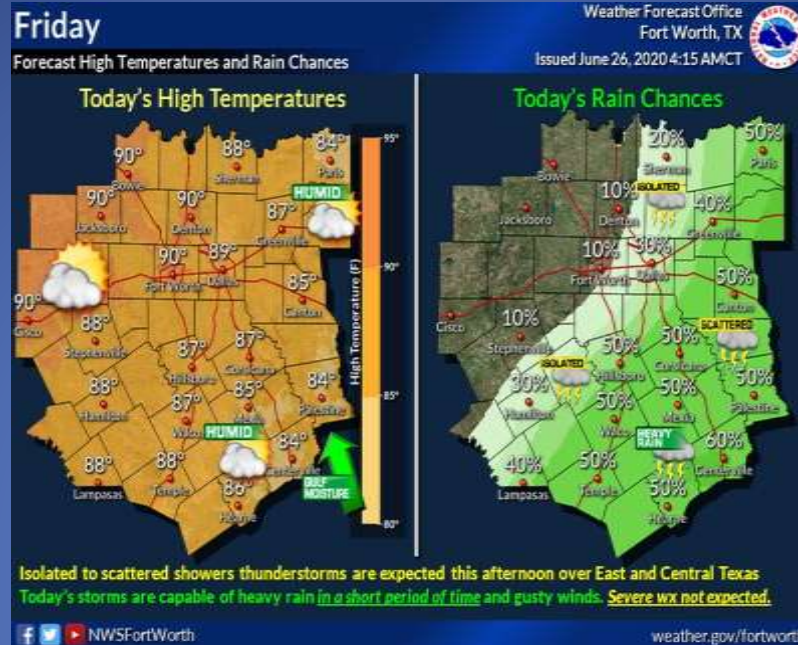

Locally Heavy Rainfall and Gusty Winds Possible with T'Storms

Weather Forecast Office
Brownsville/RGV, TX
Issued Jun 26, 2020 5:00 AM CDT

Scattered to numerous showers and thunderstorms are expected again from this morning into this afternoon. Locally heavy rainfall and gusty winds will be possible with thunderstorms. Additionally, areas of minor flooding to isolated to scattered flash flooding will be possible. Small craft should exercise caution on the coastal waters.

Hazardous Weather

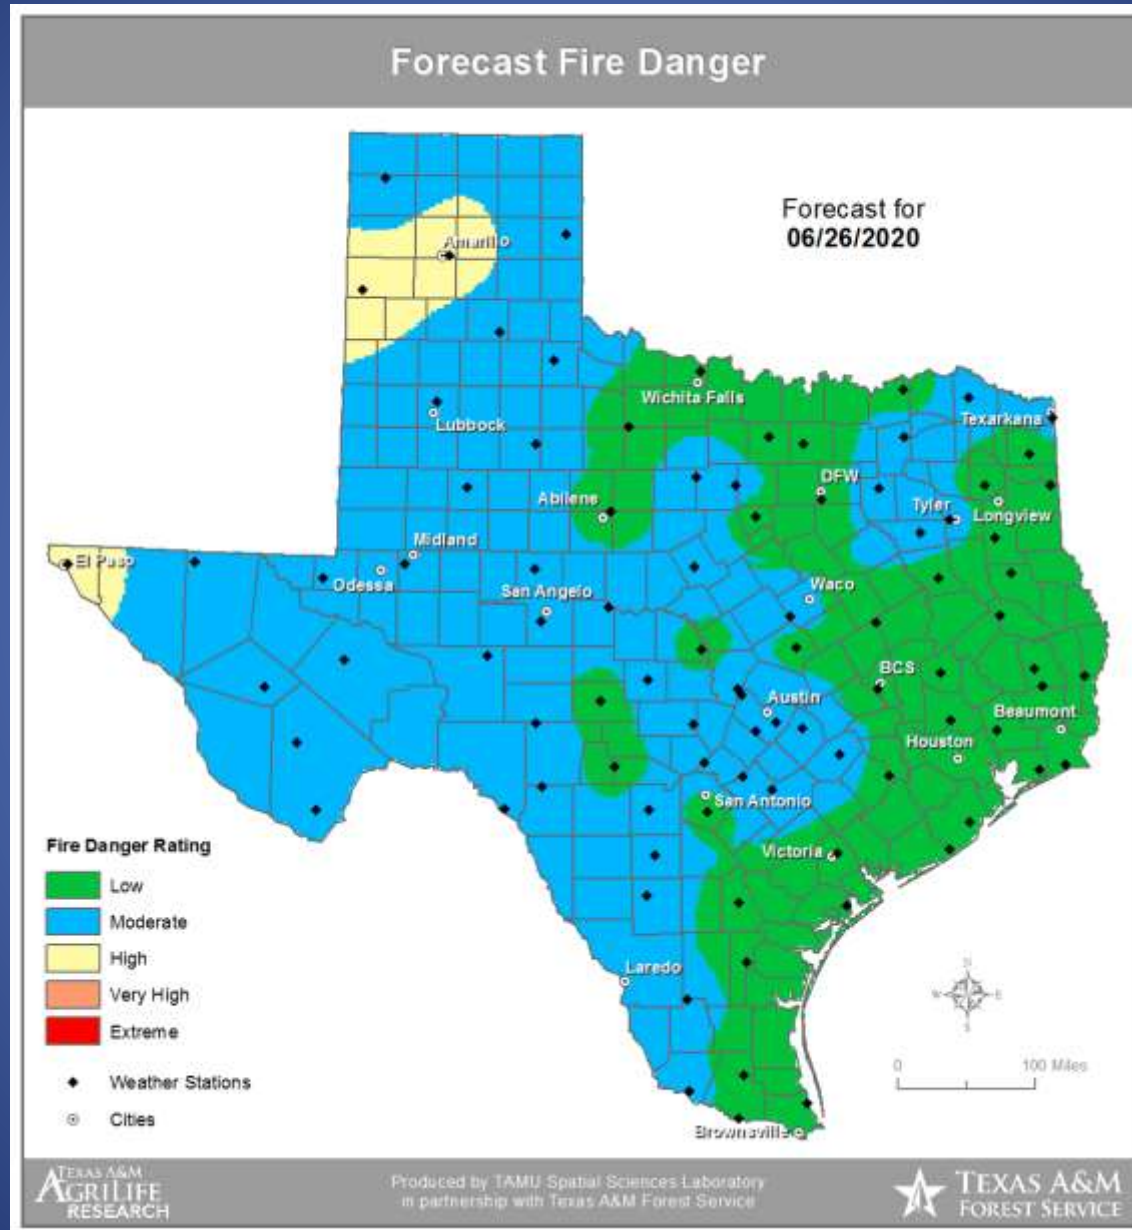

It will be hot and humid today with isolated to scattered showers and thunderstorms across Central and East Texas. The storms today will be capable of producing heavy rain in a short amount of time leading to localized flooding. Outside of precip, highs should be in the 90s with heat index values several degrees warmer than the air temperature.
